

## **Deleting Voicemail Messages Permanently**

If you get a message saying that your "voicemail is full" even though you've deleted all your voicemail messages, that means you need to empty your voicemail recycle bin. When you delete a voicemail message, it goes into a recycle bin first so in case you deleted the voicemail message by accident it can still be recovered. Since the voicemail message wasn't truly deleted, it will count towards the limit of your voicemail size.

### **To empty your recycle bin when you get the "voicemail is full" message:**

press 7 (delete messages section)

press 1 (delete voicemail)

### **To empty your recycle bin so you don't get the "voicemail is full" message:**

press 3 (review old messages section)

press 2 (deleted messages section)

press 2 (erase section)

press 1 (delete messages)
