

## How to Use the Poly Studio USB Video Bar

### **Explanation:**

The Poly Studio USB video bar is used for video and audio conferencing and is located on the top of the TV in the Bus Training Room. The video bar has a camera, microphones, and speakers built-in. The video bar is connected to the trainer PC TRAINING05, and the PC is connected to the TV.

### **Instructions:**

1. Turn on the TV. The TV input should already be set to HDMI 1.
2. From the trainer PC, start your video or audio conference application (Ex: Cisco Webex, Microsoft Teams).
3. Check the camera settings in the app that you are using for your video or audio conference. The camera should be set to **Polycom Studio Video**.
