

WI-FI INFORMATION

GoTriangle has two wireless networks that can be accessed from the Bus, DATA, and Plaza locations. One is called **GoTriangle Employees Wi-Fi** and is for exclusively GoTriangle Employees with a computer username and password. The other one is called **GoTriangle Guest Wi-Fi** and is for anyone who doesn't have a computer username and password, and for anyone who isn't an employee at GoTriangle.

For the **GoTriangle Employees Wi-Fi** network, you will not need a password to connect to the network. Once you're connected to the Wi-Fi, a splash page will open (if a splash page doesn't open, open up your web browser manually, and attempt to go to a website). Enter in the same username and password that you use for your work computer, and then click "Sign In".

For the **GoTriangle Guest Wi-Fi network**, the password can be found on a sheet in any of the conference rooms.

Please note, do not share your username and password with anyone else. If there's a problem with the Guest Wi-Fi network, contact IT. **DO NOT SHARE YOUR USERNAME AND PASSWORD.**
